

REMARKS/ARGUMENTS

Claims 1-73 are pending in the instant application. An election in response to a restriction requirement was filed on October 24, 2005. The Examiner has deemed that response as non-responsive to restriction requirement. Applicant respectfully submits the following.

The Examiner has required restriction to one of the following inventions under 35 U.S.C. 121:

- I. Claims 1-54
- II. Claims 55-61
- III. Claims 62-73

In response, Applicant elects, without traverse, to prosecute claims 62-73 of group III.

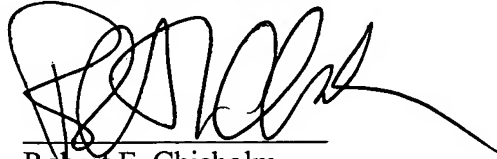

Applicant is also required to provisionally select a species should no generic claim be finally held as allowable. Applicant therefore selects Species B of Figure 5 for such purpose. Applicants respectfully submit that claims 62-73 read upon the computer program for the control module of that Figure.

Applicants also respectfully submit, for the further consideration of the Examiner, that the elected claims all read upon the subject matter of Figures 2-4 as well. As such, Applicant submits that the elected species actually reads on Figures 2-5.
